# ACKNOWLEDGMENTS

The end result of this volume is in large part due to the many individuals and institutions whose assistance was critical in locating and compiling the data found herein. Of special significance was Mr. Philip Lampi of Gilbertville, Massachusetts, whose collection of early American election returns (pre-1825) is incomparable. He generously gave me complete access to his collection. Without his assistance this volume would be far less comprehensive. The interlibrary loan departments of the Glendale and Phoenix, Arizona, public libraries were particularly helpful in obtaining many microfilms and text materials that facilitated my research efforts.

# PREFACE

The office of governor pre-dates both the U. S. Constitution and the American Revolution. The office existed in all the colonies of British America as either an elective or an appointive office. The colonies of Connecticut and Rhode Island were self-governing charter colonies and directly elected their governors. In Connecticut this began in 1662 and in Rhode Island in 1664. In the other colonies the governor was appointed by either the king or his agent.

Probably as a consequence of what the colonies had experienced from the royal appointments, the first governors chosen by the states were figures of limited authority. Indeed a majority of state governors were initially chosen by the legislature. And in all but one state (New York) where there was a popular election, the choice could still fall to the legislature if no candidate received a majority of the votes cast in the election. Also with the exception of New York all other elected governors served a term of one year. Except for Massachusetts, no Governor possessed the veto power; in most cases this power was shared with others as a part of a multi-member council or similar body.

Following the adoption of the United States Constitution, however, states began to provide for an elected rather than an appointive governor: Pennsylvania in 1790 and Delaware in 1792. Except for Kentucky (1792–1799) and indirectly Louisiana, all new states opted for a popularly elected governor, with only Maine providing for a term of but one year. (For the term lengths of other states, see the “Length of Term” table in the Tables section.) By 1851 all the states but South Carolina provided for the popular election of the governor and only the New England states had a term of one year.

As a consequence of popular elections, longer terms and the acquisition of the sole power to veto, the governor emerged as the most important political figure of the state.

This volume provides the data about those popular elections on a level not before published. It offers not only the returns at the statewide level but for the first time a national compilation of returns by county in all states from 1776 to 1860. The data are based, wherever possible, on official returns.

## Research and Sources

The primary goal of this project was to obtain official returns both at the state and county level. When re-

turns were used that were not considered official this is noted accordingly. Sources for the data are listed following each election's returns.

Three groups of sources provided the major part of the returns: journals of the various legislatures, original manuscript data and returns as published in newspapers.

The journals are a significant source of returns because it was the function of many state legislatures to count the votes for governor and certify the result. Unfortunately not all journals contain this information and as the reader will discover, the material in the journals varies not only from state to state but often from election to election. In states such as California, Delaware, North Carolina and Pennsylvania all the returns can be found in the journals. But in Georgia journals only the state totals were published. In some states there were no returns in the journals. The Library of Congress has an extensive collection of journals for this period from virtually every state. This centralized holding was of immense help in utilizing this source of information.

Manuscript returns were also found in several states and form the major part of the returns from Illinois, Massachusetts and New Hampshire. For other states, newspapers were the main source, as in New York, where state law required that the official returns be published as a matter of record in one or more newspapers for each election. But in most states, returns come from more than one of the above sources.

Only two published sources have attempted a national compilation of returns from gubernatorial elections, and in both instances the returns were at the state level only. Joseph E. and Jessamine S. Kallenbach's *American State Governors 1776–1976* (Dobbs Ferry, NY: Oceana Publications, 1977) was not only an excellent source for state gubernatorial returns on a national scope but contributed much to the author's understanding of related matters such as length of term, date of election, term limits and special voting requirements. Also of importance are the governors' returns in *Congressional Quarterly's Guide to U.S. Elections*, 1st–4th editions (Washington, 1975, 1984, 1994 and 2001) edited by Robert A. Diamond. An additional source is the annual issues of the *Whig/Tribune Almanac* beginning in 1838, but these returns were not necessarily official. However, most of the data were obtained on a state by state basis by visiting and corresponding with state institutions.

A state by state summary of sources follows:

## ALABAMA

The journals are an inconsistent source of returns, with apparently no rhyme or reason to why some elections were published here and others were not. The archives hold a large number of manuscript returns which were a helpful alternative in several elections when there was a lack of information in the journal. Some of the above data were reproduced in Lewy Dorman's volume *Party Politics in Alabama 1850 through 1860*. Newspapers are a relatively less significant source here. Almost all the material was located at the State Archives in Montgomery.

## ARKANSAS

The journals provide returns for most but not all elections. Little Rock newspapers filled in the gaps.

## CALIFORNIA

The journals provide the returns for all elections, but in view of the challenge to many county returns other sources were considered for further analysis.

## CONNECTICUT

Until 1818 returns were obtained from newspapers and a manuscript located at the Connecticut Historical Society in Hartford. For the remainder of the time the manuscript returns at the State Archives provided complete data.

## DELAWARE

All returns were found in the *House Journal* at the Hall of Records (Archives) in Dover.

## FLORIDA

A variety of sources were used in this state. The journals have no returns.

## GEORGIA

The journals contain only statewide returns for almost all elections. A variety of newspapers were used for the county returns. There is an outstanding collection of the state's papers held by the University of Georgia in Athens, all on microfilm.

## ILLINOIS

Two excellent published sources were used: Theodore C. Pease, *Illinois Election Returns 1818–1848*, and Howard Allen et al., *Illinois Elections 1818–1990*, based on the manuscript returns. Also used were the manuscript returns that are available from the archives.

## INDIANA

Two volumes contain all of the returns: Dorothy Rikes et al., *Indiana Election Returns 1816–1851*, and Robert

J. Pitchell, *Indiana Votes*, both based on the journals and manuscript returns.

## IOWA

Except for the state's first election, found in the *Burlington Hawk-Eye*, the returns came from the journals or the original manuscripts.

## KENTUCKY

The manuscript of the late G. Glenn Clift, located at the Kentucky Historical Society in Frankfort, and various newspapers provided all the returns.

## LOUISIANA

All the returns except the parish vote of 1812 were found in the journals.

## MAINE

The returns through 1844 were largely obtained from the manuscript returns. For most of the remaining elections, state totals came from the *Maine Register, 1945*, while unofficial county returns came from a variety of newspapers. The journals give only the statewide vote.

## MARYLAND

Several different sources were used including the journals and manuscript returns.

## MASSACHUSETTS

All data were obtained from manuscript returns. The state has the oldest and most comprehensive manuscript collection of any in the nation.

## MICHIGAN

Most of the returns were obtained from the manuscript collection of the State Archives and the *Michigan Manual, 1913*.

## MINNESOTA

All returns were found in the text *Minnesota Votes* by Bruce M. White.

## MISSISSIPPI

Most of the returns were found in the journals, others largely from the manuscript returns at the State Archives in Jackson.

## MISSOURI

The early returns came from newspapers or *American State Governors*. Those from 1848 on were obtained from the journals.

## NEW HAMPSHIRE

All returns but one prior to 1806 came from the *New Hampshire Manual, 1917* (statewide totals only); thereafter from the manuscript returns at the State Archives in Concord.

## NEW JERSEY

All returns but one were obtained from the (Trenton) *State Gazette*.

## NEW YORK

All returns except the first election were found in newspapers, primarily from Albany. Beginning with the election of 1817 all returns with one exception were located in the *Albany Argus*.

## NORTH CAROLINA

All returns were located in the journals.

## OHIO

All returns were located in the journals.

## OREGON

All returns were found in the text *Oregon Votes: 1858–1972* by Burton N. Onstine.

## PENNSYLVANIA

All returns were located in the journals.

## RHODE ISLAND

Statewide totals can be found in the *Rhode Island Manual 1971–2*. Manuscript returns located at the archives in Providence provided the official county returns, but this collection is not complete. Newspapers, primarily from Providence, were used for the county totals, some of which are unofficial. The journals provide only the statewide totals.

## TENNESSEE

Manuscript returns located at the archives at Nashville, and to a lesser degree the journals, provide most of the returns through 1833. Thereafter, with the exception of 1839, all returns were obtained from the journals.

## TEXAS

A variety of sources were used: journals, newspapers, manuscript returns, and Mike Kingston et al., *The Texas Almanac's Political History of Texas*.

## VERMONT

Through 1812 returns were located in a variety of newspapers; thereafter, all returns were found in the manuscript collection at the archives in Montpelier.

## VIRGINIA

Richmond newspapers were the main source of returns.

## WISCONSIN

Several sources were used, the most frequent being James R. Donoghue, *How Wisconsin Voted 1848–1872*, 3rd edition.

## Organization

The returns are presented in two parts. The initial section presents the statewide vote for each year; this is the Annual Summary. The second and larger section provides returns by county for each state. This is organized alphabetically by state and then chronologically within each state. The sources for each year's returns are listed at the end of the year's entry.

The reader will note that in several instances more than one set of state totals is presented in the Returns by County section. Those in bold are considered the most accurate and usually also the official returns. It is these figures that are used in the Annual Summary section. Where more than one set of state totals is listed an explanation is offered in each instance. In many cases more than one set of totals is presented because there was a difference between the stated figures and the figures obtained by adding the county returns. Another frequent explanation is that the county returns were wholly or partly obtained from a different source than the state figures. See individual elections for specifics.

# TABLES

## Length of Term

This table gives the length of term of each of the governors, both elected and those chosen by the legislature, at ten year intervals.

Year	One Year	Two Years	Three Years	Four Years
1780	9	1	2	0
1790	9	2	3	0
1800	9	3	3	1
1810	9	4	3	1
1820*	10	7	3	4
1830	9	7	4	4
1840	7	9	4	6
1850	6	12	5	8
1860	6	15	3	10

\*New York is placed in the two-year column even though the election of 1820 was for three years. The Constitutional Convention of 1821 shortened the term to two years retroactively to include the sitting governor.

## Method of Election

Year	Elected*	Chosen by Legislature
1780**	5	7
1790	7	7
1800	10	6
1810	11	6
1820	18	6
1830	19	5
1840	23	3
1850	29	2
1860	33	1

\*Louisiana is placed in the elected column although the legislature chose the governor from one of the two top candidates in the popular election until 1846.

\*\*Includes Vermont. Neither New Hampshire nor Pennsylvania had created the office of governor.

## Term Limits

Year	Limits*	No Limits
1780	7	5
1790	8	6
1800	10	6
1810	11	6
1820	16	8
1830	15	9
1840	15	11
1850	17	14
1860	17	17

\*As a general rule, term limits came into existence at statehood and continued throughout the period up to 1860, although some states changed the length of the limits. Additionally three states switched: Kentucky and Ohio dropped limits while Mississippi added limits after previously having had none. See individual state returns for the specific limits.

## Party Affiliation

Listed below are the party affiliations of the nation's governors (both elected and those chosen by the legislature) on an annual basis.

During the time period 1776–1860 governors were chosen at various times of the year and began service similarly at different times of the year. The totals listed here are as of February 1st of the year indicated.

No party affiliation was computed for the years 1822–1828 or prior to 1797.

J/D — The terms were used interchangeably until about 1833 when the party began using the term Democratic exclusively.

Ad/NR — The term National Republican generally replaced the term Administration after 1829.

The table takes into account those instances where the filling of a vacancy resulted in a change of party affiliation.

# COUNTY NAMES

The county names used in the returns are those in existence at that time. Listed below are the counties whose names have been changed or abolished.

\*Returns for Perry County were not listed in the official returns but found in the archives manuscript. No returns were indicated for three relatively recently created counties: Henry (1819), Pickens (1820) and Wilcox (1819). They might have been included in their parent counties: Henry-Conecuh, Pickens-Tuscaloosa and Wilcox-Dallas & Monroe.

\*The official vote as found in the *House Journal* reported returns for only 18 out of 35 counties.

The remaining counties were found in the sources indicated in parentheses in the farthest right column. There is no explanation in the *Journal* as to why any of these counties were not included in the official returns, even though many of these returns were found in the archives files. Furthermore the vote of Decatur County was found as indicated, separately from Jackson and is listed below. The vote of all the above counties:

Pickens	13,580 (57.5%)	Chambers	10,033 (42.5%)
Decatur	119 (18.7%)		418 (81.3%) (2b)

\*The totals in bold were those found in the *Journal*, Alabama House of Representatives, November 25, 1831, p. 31 and represent the "official returns." However no county returns were included with this citation.

The county returns were obtained from the sources cited below. It would seem that several counties were not included in the official totals, but there is no known source that details this information. Two other sources—*American State Governors* by Kallenbach and Kallenbach and *The Guide* by Diamond (ed.)—give identical state totals; they were probably obtained from the files of the Inter-University Consortium.

\*The returns in bold are the official returns as found in the *Journal* of the Alabama House of Representatives, November 20, 1835, p. 23: no county returns given. It would appear likely that several counties were excluded from the official returns. However, in the absence of county returns in an official source there is no way of determining this. The totals in parenthesis are the figures obtained from the county returns. Most of the county returns were found in the files of the State Archives. The totals listed below were found in *American State Governors* by Kallenbach and Kallenbach as well as the *Guide* by Diamond (ed.), probably obtained from the files of the Inter-University Consortium.

\*The California Constitutional Convention divided the state into 10 election districts for this election. Counties were not established until after the election of the first state legislature.

\*\*The returns as found in the Senate Journal only give the district vote for Burnett and Sherwood; the manuscript returns provide the district returns for all of the candidates. However, Geary's total in the manuscript returns is 1,358; these are the only district returns uncovered and are used here, although the state total is from the Journal. The district returns and totals for Burnett and Sherwood are from the Senate Journal. Although the district returns for Sutter and Stewart are from the manuscript returns the state totals for these candidates are the same in both sources.

\*The Journal of the California Senate lists these counties as disputed and separate from the other counties. It also gives two separate state totals: not disputed, Bigler 15,614 (50.6) and Reading 15,244 (49.4), disputed 7,560 (50.2) and 7,489 (49.8). However, the Journal also gives a combined vote as listed above, without indicating if the disputed votes were in fact counted. All other sources checked, including a later edition of the *California Blue Book*, used the combined totals as indicated here.

\*Listed in the Senate Journal as "Informal Returns" separately from the other counties, which are listed as "Formal Returns." Three sets of vote totals are also provided. Formal: Bigler 31,797 (51.6) and Waldo 29,773 (48.4). Informal: Bigler 7,143 (48.2) and Waldo 7,691 (52.8), as well as the above combined totals. The implication seems to be that only the formal returns were counted. However, all the other sources located all used the combined totals as listed here.

However, the manuscript copy certified by the Secretary of State and sent to Governor Bigler on November 3, 1855, included the returns from these counties and they are listed below. Other sources checked all include the returns from these three counties but offer differing totals. See *Guide* 4th edition by Diamond (ed.); (California) *Blue Book 1908*; L.P. # CONNECTICUT

One of the 13 original states, Connecticut was one of two self-governing colonies and operated under a colonial charter that provided for an elected governor.

On October 2, 1776, the General Assembly declared the colonial charter the basic law of the state.

**Term**—One year. **Majority vote**—A candidate to be elected had to achieve a majority of all votes cast.

If that did not occur the choice was to be made by the General Assembly and the Executive Council.

Under the 1818 constitution this was modified to the extent that the choice would be made by a joint vote of the two houses of the legislature from the two highest in the popular vote. **Election**—Second Thursday in April until 1836 when the date was changed to the first Monday in April.

# DELAWARE

One of the original 13 states, Delaware adopted a constitution effective September 20, 1776.

This document provided for an appointive governor, chosen by a joint vote of the Legislature.

The Governor served a three-year term but could not immediately succeed himself.

The state's second constitution provided for an elective Governor beginning in 1792.

**Term**—Three years until 1832 when the term was increased to four years.

**Election**—First Tuesday in October until 1832 when the date was changed to the Tuesday after the first Monday in November. **Limits**—Initially the governor could not immediately succeed himself but in 1832 an individual was limited to one term.

\*The official state totals are in bold, those in parentheses are the added returns. The county returns were taken from the manuscript returns furnished by the archives except for Holmes County whose returns were obtained from the (Tallahassee) *Floridian*, November 3, 1860. The manuscript returns did not contain a state total. Except for the fact that the votes of Brevard and Dade counties were not officially counted in the congressional election held simultaneously, the total vote for Congressman are very similar to those for governor. Thus the significant difference between the added state totals based on the manuscript returns and the official state totals could not be reconciled.

# GEORGIA

One of the original 13 states. Initially the Governor was chosen by the unicameral legislature from among its own members. In 1789 this was changed as a result of the creation of a two house legislature; the governor was chosen by the Senate from amongst three members named by the Assembly.

In 1795 the method was changed to a joint vote of the legislature.

Under the appointive system the governor originally served a one-year term but service was limited to one year in three. In 1789 the term was increased to two years with no limit on reelection.

**Term**—Two Years. **Election**—First Monday in October. **Majority Vote**—A candidate had to achieve a majority of the popular vote to be elected. In case this did not occur the governor was chosen by a joint vote of the Legislature choosing between the two highest candidates in the election.

\*Many newspapers combined the votes cast for candidates other than Forsyth under the term "Opposition." However, the *Augusta Chronicle*, October 5, 10, 13, 17, (Athens) *Athenian*, October 5, the (Macon) *Georgia Messenger*, October 9, (Savannah) *Georgian* in reporting returns from 45 counties identified the opposition vote by candidate. Out of 6,367 opposition votes Edward F. Tattnall had 2,015 in 12 counties, — Mc Donald had 1,026 in four, Freeman Walker had 826 in two, Alfred Cuthbert got 892 votes in six and there were 1,678 votes cast for several other candidates. In fifteen of these counties Forsyth got all the votes.

The *Recorder* of November 1, 1827, stated that with only one county missing, the state total was Forsyth 22,704 and Opposition 9,416. No official state total has been located.

# INDIANA

On December 11, 1816, Indiana became the 19th state.

**Term**—Three years, until 1852 when it was increased to four years.

**Limits**—No more than six years in a nine year period until 1852 when, in conjunction with an increase in the term, governor could not immediately succeed himself.

**Election**—Beginning with the state's first election, the first Monday in August.

In 1852 the date was changed to the first Monday in October.

\*The official returns as found in the Journal of the House of Representatives, 1825, p. 23, gave Ray **13,040** (56.1%) and Blackford **10,218** (43.9%) but contain no county returns. Furthermore, Governor Ray in his first message to the Legislature stated that 11 counties had not made returns. Thus the above returns, largely drawn from newspapers (see below), no doubt include returns not received by the Legislature when it counted the vote.

## K E N T U C K Y

Kentucky became the 15th state on June 1, 1792, after previously having been part of Virginia.

Until 1800 the governor was elected by a group of electors chosen by popular vote from the same districts as elected members of the Kentucky House of Representatives, for a term of four years.

Under the constitution of 1799 the governor was popularly elected.

**Term**—Four years. **Election**—The first election was held on the May 6, 1800, and thereafter the first Monday in August. **Limits**—No restriction prior to the change to popular election.

Beginning with popular election the governor could not succeed himself for seven years, reduced to four years by the 1850 constitution.

## POPULATION

1790—73,677    1800—220,955    1810—406,511    1820—564,317    1830—687,917  
 1840—779,828    1850—982,405    1860—1,155,684

James Garrard was chosen by the electors as Governor from June 1, 1796, until his election by popular vote in 1800.

# LOUISIANA

Louisiana became the 18th state on April 30, 1812.

The first election for governor was held June 29–July 1, 1812.

**Term**—Four years. **Limits**—Governor could not immediately succeed himself.

**Election**—First Monday in July, for three days. The 1846 election was held on January 5th, that of 1849 on November 5th, and that of 1852 on December 6th;

thereafter it was held from the first Monday in November. **Legislative role**—In the original constitution, the final choice for governor was left to the Legislature, choosing between the two top candidates.

The Legislature in each instance chose the leading candidate. This practice was eliminated after the 1842 election.

# MAINE

Maine became the 23rd state on March 15, 1820.

Prior to that time it was part of Massachusetts, known as the “District of Maine.”

**Term of office**—One year. **Election**—Second Tuesday in September, except for the initial election which was held on April 3, 1820.

For returns prior to 1820 see Massachusetts under the District of Maine.

Because the date for the new Governor to take office was changed there was no Gubernatorial election in 1851. **Majority Vote**—A candidate to be elected had to receive a majority of all votes cast. In the absence of that the Senate chose one person from two submitted by the House from among the four highest in the popular vote.

MARYLAND

Maryland was one of the original 13 states.

The governor was originally chosen by a joint vote of the legislature for a one-year term and could not serve more than three consecutive terms.

After a four year interval he was eligible again. Popular vote elections began in 1838.

**Term of Office**—Three years, increased to four years with the election of 1853.

**Election**—First Wednesday in October until 1853 when it was changed to the first Wednesday in November.

**Limits**—Governor could not immediately succeed himself. In addition the state was divided into three districts and the governor was chose in rotation from each of the three districts.

The districts were: **Eastern**—Caroline, Cecil, Dorchester, Kent, Queen Anne’s, Somerset, Talbot and Worcester counties; **Southern**—Anne Arundel, Calvert, Charles, Montgomery, Prince George’s, St. Mary’s counties and the city of Baltimore; **Northwestern**—Allegany, Baltimore, Carroll, Frederick, Harford and Washington counties. In 1838, 1847 and 1857 the candidates came from the Eastern District, in 1844 and 1853 from the Southern District and in 1841 and 1850 from the Northwestern District.

\*The county returns except for Allegany and Calvert are from the manuscript returns; the other two county returns were obtained from the *Baltimore American*, October 28, 1850, and the *Whig Almanac*, 1851, p. 60. Both these sources gave the same returns for these

counties as well as all others. But the official returns, in bold, based supposedly on the data in the journals of the legislature, are significantly different. No journal has been found containing any returns; nor did the legislature meet in 1851, due to constitutional changes.

# MASSACHUSETTS

One of the original 13 states. Massachusetts established the office of governor in 1780 when it adopted its first constitution. **Term of office**—One year.

**Election**—The first election was held in September and thereafter elections were held on the first Monday in April until 1831. In that year a change in the date the governor assumed office resulted in two elections. The second election was held on the second Monday in November and thereafter until 1855 when the date of election was changed to the first Tuesday after the first Monday in November. **Majority Vote**—The winning candidate had to receive a majority of all votes cast; if no candidate achieved this then the legislature chose the governor. The House of Representatives sent the names of two of the four top candidates in the election to the Senate who chose one of the two as governor. This procedure was abolished in 1855 with only a plurality necessary for election.

**Special situation**—Until 1820 Massachusetts included the present state of Maine. These returns are part of the Massachusetts vote and are listed under the name district of Maine.

## POPULATION

**1790**—378,787 (475,327)    **1800**—422,845 (574,564)    **1810**—472,040 (700,745)  
**1820**—523,287    **1830**—610,408    **1840**—737,699    **1850**—994,514    **1860**—1,231,066

The figures in parentheses represent the combined population of Massachusetts and the district of Maine.

Michigan became the 26th state on January 26, 1837.

The first election for governor was held on October 5, 1835. Term—Two years.

Election—First Monday and Tuesday of November, changed to the first Monday in November by 1844 and then to the first Tuesday after the first Monday in November, 1850. The election of 1851 was for one-year term as a result of a constitutional amendment changing elections to even numbered years.

\*The actual figures found in the Senate Journal 1821, p.122, give Charles B. Green 1,269 and George B. Green 148, without benefit of county figures. However, the county totals obviously combine the two and produce a figure two more than the Journal's figure.

# NEW HAMPSHIRE

New Hampshire was one of the original 13 states.

The office of governor, originally called “President,” was not created until 1784.

In 1792 the title was changed to governor. **Term**—One year. **Election**—Second Tuesday in March.

**Majority vote**—A majority of all votes cast was required for an individual to be elected governor.

In the absence of that, the matter was decided by the Legislature; the House of Representatives nominated two from the four candidates receiving the greatest number of votes, and the Senate then chose one of the two.

## POPULATION

1786—95,801    1790—141,885    1800—183,858    1810—214,460    1820—244,161  
1830—269,328    1840—284,574    1850—317,976    1860—326,073

The population figure for 1786 was from a state census.

## NEW YORK

New York was one of the original 13 states and the first to provide for an elected governor to serve for a term of more than one year.

**Term**—Three years until 1820, two years thereafter. **Election**—The election of 1777 was held in June.

From 1780 through 1820 the election was held on three consecutive days starting with the last Tuesday in April.

Beginning in 1822 the election was held for two days on the first Monday and Tuesday in November.

In 1842 it was changed to one day, the first Tuesday after the first Monday in November.

## POPULATION

1771—168,077    1786—238,897    1790—340,120    1800—589,051    1810—959,049  
 1820—1,372,812    1830—1,918,608    1840—2,428,921    1850—3,097,394    1860—3,889,735

The population figure for 1771 is from a colonial census, that of 1786 from a state census.

\*The British occupied the counties of Kings, New York, Queens, Richmond and Suffolk and most of Westchester during this election and until November 23, 1783. Consequently no election was held in these areas.

\*\*It appears that the vote of Orange County was not part of the official returns as mentioned below. This county's vote was found by Alfred Young in the papers of Pierre Van Cortlandt, Sleepy Hollow Restoration, Tarrytown, New York. See *Democratic-Republicans of New York*, pp. 24, footnote #81.

SOURCES—The statewide totals have been found in the (New York) *Red Book 1928*, *New York Civil List 1874* and Alfred F. Young, *Democratic-Republicans of New York*, all citing the manuscript returns, which apparently included the vote by county but only for Clinton and Schuyler (miscellaneous Papers 37, 225–233, Secretary of State). The county and military totals were taken from Young's work.

\*The State Board of Canvassers rejected the returns of these counties on the grounds that the ballots had not been delivered by the proper county authority (the sheriff) to the Secretary of State's office. It was generally believed that this deprived Jay of the election. For a discussion of this matter see Alfred E. Young, *The Democratic-Republicans of New York The Origins 1763–1797*, (Chapel Hill, N.C.: University of North Carolina Press, 1967), chapters 13 and 14.

\*In the official canvass the vote of Hamilton County was included with that of Fulton County, but the *Whig Almanac, 1845* gives the major party vote for each county which equals the vote in the official canvass for Fulton–Hamilton combined. However, it does not give the vote for the Liberty Party candidate. The vote for the two counties:

Fulton	1,960	1,959
Hamilton	247	144

Ohio became the 17th state on March 1, 1803. The initial election for governor occurred on January 11, 1803.

**Term**—Two years. **Election**—The second Tuesday in October.

The adoption of a new constitution in 1851 changed the gubernatorial election to odd years effective that year.

**Limits**—Governor could not serve more than three consecutive terms; this was eliminated by the 1851 constitution.

\*This data is taken from the official returns as published in the Journal of the Ohio State Senate, 1803, p.3. However, additional county returns were included in the returns published in the (Chillicothe) *Scioto Gazette*, January 15, 22, February 26, 1803 and the (Cincinnati) *Western Spy* and are listed below. Dr. Donald J. Ratcliffe, who has specialized in Ohio political history, in an article in the *Journal Of The Early Republic*, Fall, 1987 has suggested that there were additional votes cast. Indeed my own research uncovered some scattering votes in Hamilton County.

<b>Total</b>	<b>2,749 (54.2%)</b>	<b>2,318 (45.8%)</b>

\*The original returns, which were published in the Ohio Senate Journal, 1807, page 8, gave votes for Meigs under 19 different spellings and five for Massie. However, the Legislature decided to reject all the returns from 10 of 21 counties. The rejected vote is listed below plus the vote of Scioto county which was not included in any of the above. Also Thomas Worthington received 269 votes in Clermont County.

\*The returns as found in the House Journal contain at least one error. The Cuyahoga vote for Ford is listed as 2,329, but if this figure is used plus all the other county figures in the above they would add up to less than Weller's total. Other sources give Ford 3,329 plus 84 votes listed under scattering in Crawford County but credited to him in all other sources. Using the above figures, the total adds up to the stated total of 148,756. In addition all other sources including the (Lebanon) *Western Star*, October 13, 1848, give Ford 2,801 in Warren County compared to the Journal's 2,791.

Weller's stated total of 148,445 is 117 less than the sum of the county figures. But there is also a difference between the Journal's figures and the returns as reported in the (Columbus) *State Journal*, November 25, 1848, and the (Canton) *Ohio Repository*, November 1, 1848; both newspaper returns are listed as official and report identical county returns.

The differences between the Journal returns and the two newspapers' returns regarding Weller are as follows:

County	Journal	Newspapers
Ashtabula	963	936
Lorain	1,551	1,521
Madison	671	691
Stark	3,388	3,288
Union	789	785

Efforts to reconcile the differences between the two sources by use of local newspapers were only partially successful as only in Stark County has a local paper been located for 1848. The *Repository* returns add up to 3,288, based on the township by township figures as well as the stated total in its edition of October 18, 1848, listing the official county returns.

If the newspapers' figures in the above counties are used except for Lorain, then the total for Weller would be 148,451. The *Repository* offers an explanation of why the Journal's figure is correct regarding Lorain.

The stated totals in both newspapers was Ford 148,666 and Weller 148,321, but adding up the county returns in both cases produced a total of 100 more for each candidate. See the above issue of the *Repository* for an explanation of some of the above discrepancies.

The returns used here are those found in the Journal except for Cuyahoga's total for Ford.

The returns as reported in the Journal are dated January 22, 1849, but we did not discover any newspaper story about the final returns. The Legislature delayed the matter for about two months due to disputes concerning the seating of its own members.

My own conclusion is that the correct totals are: Ford 148,766 and Weller 148,451.

\*\*Stated totals are in parentheses.

Rhode Island was one of the 13 original states and was one of two self-governing colonies. The elected office of governor dates back to 1663 when the colony was given a charter by the Crown.

This compilation starts with the election of 1776.

**Term**—One year. **Election**—First Wednesday in April.

**Majority Vote**—The winning candidate had to receive a majority of all votes cast.

If this was not achieved, then the lieutenant governor served as governor until such time as a new election was ordered by the Legislature. Under the 1842 constitution, if no candidate achieved a popular vote majority then the Legislature by joint vote chose from one of the two top candidates in the election.

## POPULATION

1776—55,011    1782—52,391    1790—68,825    1800—69,122    1810—77,031  
1820—83,059    1830—97,210    1840—108,830    1850—147,545    1860—174,620

Both pre-1790 population figures are from state censuses.

South Carolina was one of the original 13 states.

Throughout the period covered by this volume, the governor was elected by a joint vote of the Legislature for a term of two years. Consequently there are no popular vote returns.

The Governor could not succeed himself for four years.

Tennessee became the 16th state on June 1, 1796.

Until late December, 1789, the area that became the state of Tennessee was part of North Carolina.

Congress on May 26, 1790, established a territorial government that lasted until statehood.

The first election for governor was held in March, 1796.

**Term**—Two years. **Election**—First Thursday and Friday in August, second day was eliminated in 1834.

**Limits**—Governor could not serve more than three successive terms.

The *Knoxville Register*, October 10, 1823, reported what was apparently the official totals, the figures in bold. No county returns were listed, and it was noted "From many counties no returns had been received, owing perhaps, to the circumstance of there being no opposing candidate to the present incumbent."

\*\*It would appear from the Senate Journal that the votes of these counties were rejected and considered unofficial. The Senate instructed the Secretary of State to correspond with the sheriff of each county for the official vote. But there is no later entry to indicate what, if anything, occurred. However, all other sources located — *Whig Almanac, 1850*, Kallenbach and Kallenbach and Diamond — all use the figures that include the three counties in question.

\*The returns for those counties followed by a single asterisk (\*) were found in the (Austin) *Texas State Gazette*, September 6, 1851.

\*\*The official totals in bold were taken from the Senate Journal of November 8, 1851. There were no county returns. The official totals were also located in Kingston, Attlessey and Crawford, p. 53. Those totals in parentheses are the added county returns. The county returns were taken from Kingston, Attlessey and Crawford, p. 53 and were mainly based on the returns at the archives. However, the archives' returns are incomplete.

\*The official state totals, figures in bold, were found in the Texas Senate Journal, November 7, 1855, p. 47; there were no county returns. The figures in parentheses are the added county returns.

Except for those counties followed by a single asterisk (\*), all county returns were taken from Kingston, Attlesey and Crawford, and these are based mainly on the archives' returns. The archives' returns, however, are incomplete. The other county returns were found in the *Galveston News*, September 18, 1855. Returns taken from the *News* did not contain the vote for Johnson and Wood and this is indicated by a "?". Counties listed in italics were not included in the official returns.

# VERMONT

Vermont became the 14th state on March 4, 1791.

It had had its own government since it had adopted a constitution in 1777.

The compilation of returns begins with first election for governor in 1778.

**Term**—One year. **Election**—The first election was held on March 3, 1778, and thereafter on the first Tuesday in September. **Majority Vote**—A majority vote was required.

In the absence of that, the unicameral legislature (the General Assembly) and the executive council jointly chose the governor. Beginning with 1836 the General Assembly and the Senate chose the governor from amongst the top three candidates in the general election.

# VIRGINIA

Virginia was one of the original 13 states and included what became the state of West Virginia throughout the period of this work. The present state of Kentucky was also part of Virginia until June 1, 1792.

**Term**—Four years. **Election**—The first popular election was held on Monday, December 1, 1851, and thereafter on the fourth Thursday in May. **Limit**—Governor could not immediately succeed himself.

**Legislative election**—Until 1851 the governor was elected by a joint vote of the Legislature. The term was one year, with a limit of three consecutive terms. In 1830 the term was increased to three years, but the governor could not immediately succeed himself.

## POPULATION

1790—747,610	1800—880,200	1810—974,600	1820—1,065,366
1830—1,211,405	1840—1,239,797	1850—1,421,661	1860—1,596,318

All census figures include the present state of West Virginia. The 1790 census did not include Kentucky.
